If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

**IMPORTANT REMINDER:** Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

***Allowable Subject Matter***

2. Claims 1-41 are allowed.

The following is an examiner's statement of reasons for allowance:

Claim(s) 1, 30, and their dependants thereof, are allowed because the closest prior art of Ziren (US Patent No. 7,177,602) discloses electronic device having automatic frequency control systems and methods and computer program products for operating the same, and Krasner (US Patent No. 6,816,111) discloses calibration and correction system for satellite position location systems, either alone or in combination, does not disclose synchronizing a carrier signal of a mobile station with a carrier signal of a base station in a cellular mobile communication system, the synchronizing including: determining or predicting a frequency variation that occurs in the mobile station due to a change in the temperature of the mobile station; and determining or predicting, separately from determining or predicting the frequency variation that occurs in the mobile station due to a change in the

temperature of the mobile station, a frequency variation that occurs when there is a change in location of the mobile station relative to the base station; and when a large frequency variation is determined or predicted, synchronizing, using an AFC algorithm, a carrier frequency of the carrier signal of the mobile station with a carrier frequency of the carrier signal of the base station more frequently than is the case when a small frequency variation is determined or predicted as defined in the specification (Figs. 3, 4, and 5).

Claim 31, and their dependants thereof, are allowed because the closest prior art of Ziren (US Patent No. 7,177,602) discloses electronic device having automatic frequency control systems and methods and computer program products for operating the same, and Krasner (US Patent No. 6,816,111) discloses calibration and correction system for satellite position location systems, either alone or in combination, does not disclose means for determining or predicting separately a frequency variation that occurs in the mobile station due to a change in the temperature of the mobile station and a frequency variation that occurs when there is a change in the location of the mobile station relative to a base station and synchronizing means for synchronizing a carrier frequency of a reference-frequency

oscillator with a carrier frequency of the base station using an AFC algorithm, the synchronizing means synchronizing the carrier frequency of the reference-frequency oscillator with a carrier frequency of a base station more frequently when a large frequency variation is determined or predicted than is the case when a small frequency variation is determined or predicted as defined in the specification (Figs. 3, 4, and 5).

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to PHUOC DOAN whose telephone number is (571) 272-7920. The examiner can normally be reached on Mon-Tue, Thu-Fri.
